The Carneros Inn, located in the heart of Napa Valley, has just implemented a Mixology Experience, a curated cocktail adventure allowing guests to forage for their own ingredients like herbs, garnishes, fruits, etc.

All of the bounty is found in gardens and orchards located throughout the property, and after guests collect their desired ingredients, they return to the bar at Farm (one of several on-site dining options) and receive a personal lesson from the property's head bartender on how to create a signature cocktail.

The new mixology experience is just one example of the property's culinary experiences. **The Carneros Inn's** culinary team relies heavily on local, organic and sustainably raised ingredients, but they also heavily utilize ingredients directly from the property's chef gardens which are quite impressive. The culinary venues on-site include FARM, Boonfly Café and Hilltop Dining Room.
